Alaeddine NAJJAR

ACCOUNTS CTO · FINOPS · CLOUD & ENTERPRISE ARCHITECTURE

alaeddine.najjar@gmail.com · Based in France · International experience · linkedin.com/in/alaeddinenajjar · t.me/alanajj

I lead teams, shape resilient IT platforms and guide digital transformation so technology advances business objectives. My experience spans cloud computing, cybersecurity, software and enterprise architecture.

Selected impact

950 k€

Annual savings through SQL licensing optimization.

EUR 120K

Annual Azure savings for a strategic account.

-80%

Time spent preparing compliance reports.

-30%

Security incidents after full resource coverage.

Managed services growth

Advised teams through opportunity, proposal and delivery phases, contributing to two Infrastructure and Workplace managed services contract wins valued at over €7 million and €15 million respectively, as well as broader scopes and extended contract terms.

Expertise

CTO leadership & technology strategy

Shape technology direction, align architecture and investment with business priorities, and turn executive goals into clear roadmaps and measurable outcomes.

Senior cloud & enterprise architecture

Design and guide resilient cloud and hybrid architectures across Azure, AWS, Citrix and enterprise platforms, balancing security, integration, scalability and operational needs.

Cloud modernization & transformation

Lead architecture-led transformation from legacy and infrastructure environments toward more adaptable cloud services, with attention to migration choices, governance and long-term maintainability.

FinOps & cloud cost governance

Improve cost visibility, accountability and resource efficiency. Apply FinOps practices to identify savings opportunities and establish governance that helps sustain the results.

Cybersecurity, IAM & risk

Bring security and identity considerations into architecture and delivery, drawing on experience in identity and access management, cybersecurity and enterprise environments.

Service leadership & operational excellence

Connect architecture with service management, platform reliability and team leadership, using structured governance and operational practices to support dependable technology services.

Executive advisory & customer engagement

Build trusted relationships with clients, technical teams and senior stakeholders; communicate complex options clearly and guide decisions from discovery through implementation.

Professional experience

Fujitsu · France 2023 — Present

Accounts CTO (Sep 2024 — present); Technical Team Lead, Cloud Architect AMCS (Sep 2023 — Aug 2024)

Current focus: FinOps, TOGAF, ITIL, Azure, AWS and Citrix. Advises account teams through managed-services opportunities and proposals, contributing to two Infrastructure and Workplace contract wins valued at over €7 million and €15 million respectively, plus scope expansions and term extensions.

Desjardins · Montréal 2016 · 2021 — 2023

Principal Solutions Architect (Oct 2021 — Sep 2023); Consultant, IAM Specialist (Jan — May 2016)

Financial services and identity and access management.

Cortex génie humain · Montréal 2017 — 2021

Advisory Information Technology Architect (Sep 2020 — Oct 2021); Technical Team Lead (Jan 2019 — Aug 2020); Virtualization Specialist, Citrix / VMware / Azure / AWS (Jan 2017 — Jan 2019)

Progressive roles across IT architecture, team leadership and virtualization.

Lumenpulse 2016 — 2017

Consultant, Solutions Integrator (MDT / O365) (Jun 2016 — Jan 2017)

Montreal, Canada.

CA Technologies · Paris 2014 — 2015

Consultant, Senior Solutions Integrator (ITPAM) (Nov 2014 — Oct 2015)

Sopra HR Software · Paris 2011 — 2014

Corporate Senior TI System Administrator (Aug 2012 — Nov 2014); IT System Administrator (Sep 2011 — Aug 2012)

Progression from IT system administration to corporate senior administration.

Orange Business Services · Rennes 2010 — 2011

Technical Operations Lead, BI / Billing (Aug 2010 — Aug 2011); Information Technology Operations Specialist (Mar — Aug 2010)

Operations in business intelligence, billing and IT.

Dell Technologies · Tunisia 2009

Technical Specialist (Apr — Nov 2009)

Printing & Packaging Solutions · Tunisia 2008 — 2009

Technical Systems Analyst (Mar 2008 — Mar 2009)

Groupe Beneteau · Tunisia 2004 — 2008

Information Technology Specialist (Sep 2004 — Feb 2008)

Selected projects and contributions

International luxury group

Azure FinOps, licensing and cost governance

Role: Accounts CTO / Senior Cloud Architect · FinOps framing and follow-up

Framed the cost-optimization work, analyzed consumption and tracked actions across reservations, rightsizing, SQL licensing, storage, backups, monitoring and resource governance.

Non-production SQL licensing optimization

Role: Cloud architect · initiative identification and tracking

Identified and tracked a move from SQL Server Enterprise to Developer Edition for non-production environments, targeting lower license costs while preserving functional needs.

Azure governance, tagging and resource lifecycle

Role: CTO advisor · governance design and coordination

Defined tagging categories for project and decommissioning-related resources, and proposed consolidated tracking for Azure, FinOps and CTO initiatives.

Cloud security and posture improvement

Role: Cloud architect / CTO reference · risk coordination

Helped identify cloud security gaps and coordinate remediation with operations teams, while bringing customer decisions and dependencies into the governance process.

PCI-DSS and SWIFT compliance reporting

Role: Cloud architect · dashboard and workbook design

Designed Azure dashboards and workbooks to improve compliance visibility and reduce manual reporting effort.

Business continuity and Azure disaster recovery

Role: Initiative lead · business scoping, architecture and handover

Started business-needs collection for critical services, then guided the disaster-recovery assessment and architecture principles. Compared cloud and on-premises options and prepared the transition to delivery teams.

Data-centre resilience and modernization roadmap

Role: Senior Cloud Architect · technical and architecture audit

Led an audit focused on resilience, availability and modernization options, including cloud and managed-service pathways.

FortiSASE secure access service

Role: CTO / architect · recommendation, service design and operational handover

Compared secure-access approaches, recommended FortiSASE for a distributed user and retail footprint, and shaped the service assumptions, support model and handover.

Workplace and collaboration modernization

Role: Accounts CTO · transition governance and architecture advice

Supported the expansion and transition of Workplace/O365 services, contributed to collaboration-site migration discovery, and advised on user-environment and self-service identity initiatives.

MuleSoft and API management in the run model

Role: CTO advisor · service-scope framing

Helped frame how MuleSoft and API management could fit into the operational support model.

International life-sciences group

CTO governance and technology advisory

Role: Account CTO · options assessment and coordination

Guided technical direction, coordinated specialists and challenged solution options, with a focus on recommendations and governance rather than hands-on delivery.

Zscaler service model and secure access

Role: CTO advisor · capability assessment

Connected European and global delivery experts to assess ZIA/ZPA capabilities and shape a standard, scalable support approach.

Digital experience and proactive support

Role: Solution architect · use-case framing and expert coordination

Prepared customer-facing material and expert sessions around digital experience monitoring, with the aim of improving visibility and supporting a more proactive service desk.

ZDX and ServiceNow integration framing

Role: Technical coordinator · integration scope and responsibilities

Clarified event, field-mapping, webhook and UAT responsibilities with the relevant platform teams. This was integration framing and coordination, not a claim of completed implementation.

National grocery retailer

Azure FinOps and POS service renewal

Role: FinOps architect · reservation analysis and technical coordination

Reviewed Azure reservations, connectivity scenarios and testing scope, and prepared the financial rationale for a service renewal.

CTO governance for Azure costs and resource lifecycle

Role: Account CTO · recurring governance and follow-up

Tracked cloud costs, licensing and resource cleanup through recurring operational reviews and prioritized next actions.

International industrial technology group

CTO steering and service governance

Role: Account CTO · steering committees and cross-domain coordination

Followed service performance and coordinated discussions across recovery planning, capacity, endpoint security, certificates and data-centre architecture.

CTO transition and knowledge handover

Role: Outgoing CTO · transition and continuity

Transferred account context, active topics, stakeholder relationships and governance practices to the next role holder.

Cross-account Fujitsu contributions

Hybrid IT architecture and pre-sales

Role: Senior Cloud Architect · customer presentations and solution framing

Prepared customer-facing material on public and private cloud, managed services, cloud platforms, security operations, FinOps, DevOps, automation and modernization.

Windows 11 workplace RFP support

Role: Contributor · initial scope and responsibility mapping

Provided an initial responsibility matrix for architecture, endpoint management, packaging, security, testing and knowledge transfer. Contribution was limited to early framing; it was not end-to-end project delivery.

Managed-services knowledge sharing

Role: CTO / FinOps contributor · L3 service model and value discussion

Shared Fujitsu approaches to service value, project qualification, cloud governance, security operations and FinOps with customer teams.

Internal FinOps enablement and mentoring

Role: Technical mentor and practice contributor

Helped turn account experience into reusable FinOps material and supported apprentices with technical assignments and proposal development.

Desjardins

2021–2023 · Banking consent APIs and access models

Role: Microsoft Azure Solutions Architect · solution design and technical governance

Built proofs of concept and proposed hybrid-cloud options for banking consent APIs. Assessed Azure identity and access-management approaches using RBAC and ABAC, aligned technology roadmaps with enterprise and product stakeholders, and introduced Azure Monitor and Log Analytics indicators for service performance.

2016 · Identity and domain consolidation

Role: Identity and Access Management Architect · assessment and migration planning

Audited the Active Directory environment, recommended reliability and performance improvements, and planned the consolidation of a multi-domain user environment toward Azure Active Directory. Helped implement and monitor migration policies, Group Policy and directory relationships.

Cortex génie humain

Multi-site food and agriculture organization · Azure modernization and recovery

Role: Cloud Solutions Architect · architecture and migration planning

Designed Azure Backup across a North American multi-site environment, planned the transition of Active Directory child domains toward Azure AD while preserving dependent services, and shaped infrastructure and application recovery plans.

Managed services and solution presales

Role: Solutions Architect · service design and team enablement

Designed MFA and ADFS authentication services, guided managed-service integrations, supported a team of operations engineers, and prepared architecture and service proposal documents for customer design reviews.

Institutional investment manager · cloud security proofs of concept

Role: Cloud Solutions Architect · security architecture

Built proofs of concept for Azure security monitoring and threat detection, and modelled authentication and conditional-access use cases using Azure identity and key-management services.

Aerospace manufacturer · end-user computing modernization

Role: Cloud Solutions Architect · migration and transformation leadership

Helped assess and migrate on-premises Microsoft and Citrix virtual desktop platforms toward Citrix Cloud and Azure, documenting transformation progress and cloud cost optimization across a distributed environment.

Electrical distribution group · application and virtual infrastructure modernization

Role: Cloud Solutions Architect · migration planning and program leadership

Contributed to the migration of Citrix applications toward Citrix Cloud and Azure, and led the evolution of the customer’s virtual-infrastructure program across a broad branch network.

International airline · application virtualization and workplace modernization

Role: Solutions Architect · platform and security design

Planned application-delivery architecture across Microsoft and Citrix platforms, defined security and update practices for server

and application environments, and supported end-user device management and application delivery.

Lumenpulse

Office and desktop deployment modernization

Role: Microsoft Solutions Architect · migration leadership and automation

Led a multi-site Office 365 migration and modernized Windows application deployment with SCCM and MDT. Automated test and production installation workflows, improved sign-in and policy performance, and resolved complex Active Directory, cloud identity and virtualization incidents.

CA Technologies

ITPAM workflow orchestration

Role: Solutions Architect · architecture, requirements and proof of concept

Designed CA ITPAM 3.x solutions for production-workflow orchestration, led functional and technical requirements discovery, and ran pilots and proofs of concept for customer integrations.

Sopra HR Software

Global HR infrastructure and customer-environment migrations

Role: Infrastructure Solutions Architect · migration and service operations

Prepared customer environments for HR applications, supported multi-site infrastructure migrations, and planned transitions across Exchange and Windows Server. Applied ITIL practices, capacity planning, disaster-recovery preparation, risk management and incident processes in a global team.
